WAREHOUSE MOBILITY SOLUTION

# Integrated mobility for warehouse logistics management

# Advanced traceability for your warehouse logistics operations

| The automation of reception, preparation and dispatch processes of articles from small, medium and large companies, more agile!

New trends and challenges in a sector as competitive as the logistics / supply chain require companies and their responsible to become more agile.

inCentea Wide's Warehouse Mobility management system automatically captures essential order data, stock management and invoicing, facilitating the creation of outbound documents (delivery notes, invoices, etc.), thus giving your company earnings in the logistics operation, increased productivity and reduced operations costs.

What widepartner's Warehouse Mobility Solution adds to your logistics area:

Decrease errors in order picking

Increases inventory accuracy

Reduces delivery return rate.

# Collect products according to your customers' orders

| With the Warehouse Mobility management system, the material is identified through a barcode and its position in the warehouse.

With this information, the operator easily locates material and orders ready for shipment. Which makes the process faster and without delay.

## Key points of inCentea Wide's Warehouse Mobility solution:

### More rigor in order management

Optimizes warehouse space, reduces costs and time in receiving/collecting and identifies orders.

### Integrated operations

Thanks to data integration with your ERP, you can easily access real-time information from incoming documents, order settlements, batch records, and more.

### Quick queries whenever you need

Quickly see the information you need whether by tablet, smartphone or handheld terminals anywhere.

# Main Features

---

## Reception

- Counting/confirming goods received from external suppliers
- Identification of the reception that will be fixed/confirmed
- Change of destination warehouse

## Expedition

- Prepare/confirm items to be sent for dispatch by list or Preparation guide
- Analyze the detailed stock for shipment
- Eliminate counts already made
- Multi-Establishment Consultation

## Supply to the OF

- Prepare/confirm the items to be made available at the supply location to the Manufacturing Order

## Inventory

- Automatic stock query by SCANNER selection
- Logistic identification of stock

## Labeling

- Print quantity labels (order/original)

## Diverse Entries

- Register article lines manually, automatically, by selecting the barcode SCANNER

Overcome communication difficulties between the manager who works in the office and the operatives in the field.
