## Sage X3 for Cannabis industry

Companies face enormous challenges at an organizational level where success depends on control and traceability of its financial operations, logistics and quality.

**ERP Sage X3** has been supporting companies in the sector, guaranteeing them the necessary conditions to obtain EU certification, exclusive to cultivation and/or extraction companies, or pharmaceutical companies that are focused on processing the dried leaves into medicines, oils or edibles.

### Follow all the steps of your business

Sage X3, integrated with your business, allows you to manage and consult all ongoing operations within a single system, stock management, tracking movements of locations and operations, control access and audit, visibility of financial data and production processes, guaranteeing you reduced execution times and costs.
